

City of Neosho

Residential Fencing Guide

- Fencing *cannot* be over 6' in height.
- Fencing can not block/enclose any storm water catch basin.
- Fencing facing a street or alley must have the “improved” (nice) side facing said alley or street.
- In no case shall any front yard be enclosed by a fence unless the fence allows for a clear view of the yard and right-of-way, i.e., wrought iron, chain link, etc.
- Fencing *cannot* be constructed of barbed wire, razor wire, chicken wire, hog wire or any other similar type wire fencing.
- No electric fencing
- On any interior lot other than a through lot, a fence shall not extend beyond the side and rear property lines, nor will a fence extend beyond the front building line unless the fence allows for a clear view of the yard and right-of-way, i.e., wrought iron, chain link, etc.
- On a through lot, a fence is permitted to extend to and along the property line opposite the front of the structure. No fence shall be permitted to extend beyond any property line or the building line at the front of the structure unless the fence allows for a clear view of the yard and right-of-way, i.e., wrought iron, chain link, etc.
- On a corner lot, no fence shall be permitted to extend beyond any property line or the building line at the front of the structure unless the fence allows for a clear view of the yard and right-of-way, i.e., wrought iron, chain link, etc. Along other front building lines as platted on a corner lot, the fence shall be set back a minimum of ten (10) feet from the property line and shall not extend into the sight distance area.

Single-Family Home Fence Standards - Interior Lot
